- Create proposals and manage vendor relationships

---

## Relevant Experience:

---

AIX Architect  
Cynet Systems  
January 2012 – Present  
Marlboro, MA

- Conducted technical research and review to provide delivery of scalable architecture solutions.
- Developed architecting solutions by translation of technical requirements into architectural designs.
- Implemented procedures for data migration between various operating systems and applications.
- Analyzed AIX, Linux and Solaris platforms for preparation of non-disruptive migration strategies.
- Coordinated with technical team members in development of deployment scripts and related procedures.
- Supported engineering team members in adoption of virtualization technologies such as NPIV and layer 3

networking.

- Assisted in designing and implementation of solutions for server and application monitoring.
- Provided technical assistance for automation of manual processes utilizing PERL and other scripting languages.

AIX Architect  
Caesars Entertainment Corporation  
November 2010 – January 2012  
Las Vegas, NV

- Coordinated with data designer and ETL architect teams for determination of space requirements.
- Prepared data backup and recovery strategies in collaboration with all application teams.
- Provided technical support services to all application teams and software product users.
- Implemented procedures for storage and network tasks including zoning and allocation.
- Participated in learning of SAN architecture components and products such as Cisco switches and virtualization.
- Resolved technical issues and problems relating to network resources, storage and systems.
- Suggested effective processes to support release planning and development for all developers and administrators.
- Assisted in development and maintenance of ETL and reporting architecture for all systems.

---
