## Analog Design Engineer Resume

---

### Job Objective

To use my skills and experiences as an Analog Design Engineer to assist in the growth of the company.

---

### Highlights of Qualifications:

---

- Remarkable experience in CMOS technologies along with practicality in analog design flow steps
  - Steep knowledge of low power analog, mixed signal design, ADC, DAC, power driver
  - Proficient with PLLs, DLLs, High-speed custom and I/O, SerDes, Clock and Data Recovery, line drivers
  - Huge knowledge of IC engineering life cycle (system definition, system architecture, simulation, circuit design)
  - Strong fundamentals in circuit theory, design, and layout
  - Superior communication and problem solving skills
- 

### Professional Experience:

---

Analog Design Engineer, August 2005 – Present  
CyberCoders Engineering, Altoona, PA

- Delegated to manage in a team to design analog of digital converter circuits.
  - Outlined electronic system specifications.
  - Enforced accurate circuit verification methodologies.
  - Aided in applicable product review.
  - Established mixed-signal circuit architectures.
  - Formulated transistor-level analog circuit designs.
  - Outlined analog circuit simulation and mixed-signal verification.
  - Designed engineering documents.
  - Interpreted analog circuit layout.
- 

### Education:

---

B.S in electrical engineering, North Central College, Naperville, ILM.S in electrical engineering, Newman University, Wichita, KS
