
CAD DESIGN ENGINEER RESUME

Objective:

Seeking a position in which challenges lead way for career development in the CAD Design Engineer field.

Summary of Qualifications:

- Remarkable experience on printed wiring board design
 - Profound knowledge in design of seating related products
 - Huge knowledge in designing parts for a variety of manufacturing procedures
 - Superior CAD Design skills and excellent drafting design skills
 - Familiarity with Complementary Metal-Oxide Semiconductor (CMOS) processing, Very Large Scale Integration (VLSI)
 - Wide knowledge of electrical power transmission fundamentals
 - Proficient with Cadence PCB, APD, SIP design tools, CAE tools, PCB and IC package
 - Outstanding ability to manage with minimal supervision and resolve practical problems
 - Amazing capability to design for mechanical integrity
 - Ability to translate design inputs into functional layouts
 - Superior communication skills and
-

Work Experience:

CAD Design Engineer, August 2005 – Present
OSI Engineering, Inc., Greenville, SC

- Advanced solid models and engineering drawings.
- Managed 3-D CAD Models and Assemblies and coordinated with overseas Engineering staff.
- Outlined parts in a varied materials and procedures.
- Formulated prototype parts of CAD models.
- Designed complex mechanical fabrications.

CAD Design Engineer, May 2000 – July 2005
Radio Flyer Inc., Greenville, SC

- Outlined mechanical components.
 - Modeled designs using CAD software.
 - Formulated engineering drawings.
 - Designed prototypes and reviewed structural acceptability of designs.
 - Analyzed materials and parts for use in fresh designs.
-

Education:

Bachelor's Degree in Mechanical Engineering, Williamsburg Technical College, Kingstree, SC
