---

## Career Goal:

---

Seeking Data Mart Developer job in a data warehouse environment and explore my expertise in Oracle developing applications like TOAD and PLSQL to design Data Marts.

---

## Technical Skills:

---

Strong Technical command of online analytical processing and Business Intelligence Tools:

- Oracle OLAP, MDX
- Cognos and SAP Business Objects XI
- MS Analysis and reporting services

Profound knowledge of developing Data warehousing using:

- ETL(Extract, Transform and Load) Procedures
- DataStage Tools and SQL Server Integration Services

Data organizing qualities:

- Analytical processing
- XML file transferring

Designing and developing calibers in:

- BO Universe
- Independent data marts

Oracle based Data management:

- Ascential DataStage Server
- Java EE

Cognitively expert in:

- Data Stage XM
- DW and BI applications

Understanding of Operating systems like:

- Linux
- Windows
- IBM

Great virtuous sense:

- to identify user requirements and
- to interpret dimensional modeling

---

## Relevant Experience:

---

Data Mart Developer  
The MathWorks  
January 2012 – Present  
Ventura, CA

- Designed and supervised overall development of Data Mart and Oracle-hosted dimensional models.
- Contributed in creating ETL designs and provided end users an easy accession to data marts.
- Troubleshoot and resolved data models issues and formulated reports and analytical programs.
- Tested, adjusted and monitored alterations in designs.
- Maintained data marts up-to-date and in accordance with company's requirements and practices.
- Documented data discovery, designs, patterns and mining projects.

Data Mart Developer  
Accenture  
November 2010 – January 2012  
Fort Meade, MD

- Employed Oracle database to create and maintain Data Marts.
- Designed and developed DS data flows and ETL components.
- Extracted data mart reports and transferred from Mx 2.10 to MX 3.1.
- Developed DM feeders and reported financial office for any Risk matrix.
- Formulated processing scripts, tables, feeder batches and PL variance.
- Developed unit testing strategies and provided process improvements insight and requirements to end users.

---
