Career Goal:

To contribute my skills and expertise in Perl, Korn shell, DB2, Unix, crystal reports, SSIS, PVCS and aid in enhancing organizational effectiveness as a DB2 SQL Developer.

Technical Skills:

High technical competence to utilize scripting languages:

- Korn Shell, Bash
- C Shell
- Perl

Exceptional in utilizing Microsoft programs:

- Visio, Word
- Excel, Power point
- Access

Adroit with tools and utilities:

- Hyperion Explorer
- Xpeditor
- VSM, IBM utilities

Solid understanding of hardware and operating systems:

- Mid- tier (P series)
- IBM PCs, z/ OS, Windows
- IBM Mainframes, AIX

Crystal clear with data modeling concepts:

- Physical
- Logical
- Relational

Immense potential to develop data structures including:

- Analyzing
- Evaluating
- Optimization

Familiarity with managing data related:

- Views
- Dictionaries

Strong abilities to:

- Implement CRM and automotive concepts
- Interpret DB2 LUW utilities and commands

Relevant Experience:

DB2 SQL Developer
Pridevel Consulting, Inc
January 2012 – Present
Albuquerque, NM

- Prepared stored procedures, functional and technical specifications and complex SQL queries.
- Assisted in designing and development of DB2 and Oracle server and database objects.
- Conducted optimization and tuning of data queries and stores procedures.
- Provided assistance for modeling and execution of database enhancements and component development.
- Maintained public websites for clients with database development and support services.
- Implemented processes for debugging of defects, errors and troubleshooting problems relating to database objects.

- Supported technical teams in execution of database objects by testing services at unit, system and integration levels.
- Designed databases and relevant objects through preparation of tables, groups and indexes.

DB2 SQL Developer
Lorven Technologies Inc
November 2010 – January 2012
New York, NY

- Provided assistance for optimization and performance tuning of DB2 SQL and stored procedures.
- Prepared database design documents, code reviews, definition and structure.
- Assisted in designing and implementation of backup and recovery operations for database applications.
- Developed project and IT solutions for resolution of operational issues of all databases.
- Supported technical teams in database administration and distributed implementation along with proper documents.
- Coordinated with junior engineering teams in database administration, physical structure, architecture and related analysis.
- Resolved problems and issues relating to database server, hardware and software components.
- Conducted debugging and unit testing services of SQL code, specifications and test conditions.

Educational Background:

Bachelor's Degree in Computer Science
Christopher Newport University
August 2006 – May 2010
Newport News, VA

Professional Certification:

IBM Certified Solution Developer – DB2 9.7 SQL ProcedureJuly 2010
