
GEOMATIC ENGINEER RESUME

Objective:

Seeking the position of Geomatics Engineer in a prestigious organization where I can confidently share my expertise in Geomatics activities and use my 9+ years' expertise in GIS, Cad drafting and 2D/3D analysis.

Education:

MS in Civil Engineering, 2000
Stanford University

BS in Geomatics, 1999
Stanford University

Skills:

- Conversant with Geomatics activities such as codes, standards, and engineering practices
- Skilled in GIS, Cad drafting and 2D/3D analysis
- Solid background in data management and project management
- Working knowledge in RTK/Static GPS, conventional surveys and LiDAR
- Excellent interpersonal skills

Professional Experience:

- Geomatics Engineer III, 2005-present
- California Civil Design Group, Alpine, CA

Responsibilities:

- Developed and implemented relational databases for various spatial data sources.
- Executed mapping projects using Cad drafting and 2D/3D analysis
- Conducted field inspections involving land surveys and road construction.
- Geomatics Engineer II, 2003-2005
- Adobe Associates, Alpine, CA

Responsibilities:

- Restructured geo-databases and integrated data for engineering design.
- Developed and tested engineering software for Windows and mobile platforms.
- Designed software applications to be used in international land survey and commercial industries.
- Geomatics Engineer I, 2000-2003
- Haber, Inc., Alpine, CA

Responsibilities:

- Developed and implemented relational databases for various spatial data sources.
- Executed mapping projects using Cad drafting and 2D/3D analysis
- Conducted field inspections involving land surveys and road construction.
- Geomatics Engineer II, 2003-2005
- Adobe Associates, Alpine, CA

Certifications and Affiliations:

Certificate in Desktop Application Training
Body Design, Madison Heights, Mi – certified
