# HARDWARE DESIGN ENGINEERING RESUME

---

## Career Objective:

---

To secure a Hardware Design Engineer position with dependable firm seeking dedicated employees.

---

## Summary of Qualifications:

---

- Vast experience in hardware engineering process and testing in hardware production environment
  - Sound knowledge of hardware design and development activities
  - Familiarity with hardware product development lifecycle, Spectrum Analyzers, Oscilloscopes, Power Meters
  - Exceptional skills to perform hardware testing
  - Strong understanding of designing bill of materials for hardware product
  - Proficient with AutoCAD, Microsoft Office Suite and DCS
  - Skilled to write and review manuals and procedures and various technical procedures
  - Ability to recommended solutions and identify potential vendors
- 

## Work Experience:

---

Hardware Design Engineer, August 2005 – Present  
Factset research systems inc., Altoona, PA

- Monitored hardware engineering process such as prepared layout and installed products.
- Ensured that all manufacturing specifications were adhered to in facility.
- Designed and modified new and existing products and identified areas that needed modifications.
- Evaluated design and ensured that it would be compatible with manufacturing process.
- Provided support to engineering teams and assisted in giving certification to equipments such as EMI and seismic.
- Coordinated with engineering, manufacturing and outside vendors and assisted in design process.
- Analyzed project and monitored production process.
- Prepared a schedule and estimate for project and ensured that it was followed.

Hardware Design Engineer, May 2000 – July 2005  
Fort Wayne, Altoona, PA

- Tested and analyzed hardware and electrical design for electronic systems.
  - Developed and evaluated architecture of systems and ensured that systems met required specifications.
  - Prepared specifications for hardware and analyzed review for programs.
  - Determined and assisted vendors and production selection for process.
  - Performed corrective and preventative maintenance on equipments in facility.
  - Designed programs and ensured that all necessary components were deployed on equipments.
- 

## Education:

---

Bachelor's Degree in Electrical Engineering, West Central Technical College, Waco, GA
