## Mathematician Resume

---

### Job Objective

To obtain a Mathematician position in an organization where I can use my skills to benefit and enrich my knowledge.

---

### Highlights of Qualifications:

---

- Remarkable experience in applying mathematical disciplines to applied problems
  - Expertise in various disciplines of mathematics and statistics
  - Familiarity with mathematical tools such as Matlab, Mathematica, and Maple
  - Ability to maintain, update, and organize math models and related informatio
  - Ability to bring projects to completion
  - Ability to work in a fast-paced, deadline-oriented environment
  - Ability to Provide computer simulation and analysis of existing and new math models
  - Excellent written and verbal communication skills
- 

### Professional Experience:

---

Mathematician  
IntelliGenesis, LLC, Norfolk, VA  
May 2000 – July 2005

---

### Responsibilities:

---

- Developed mathematical theory underlying processes in the physical, biological and social sciences.
  - Formulated mathematical models to simulate processes.
  - Applied models to experimental observations and adjusted or recasted the models.
  - Applied mathematical principles and techniques to the solution of problems in research, development, production, distribution and other functional areas.
  - Utilized numerical analysis methods to develop algorithms and performed computations.
  - Developed pure mathematical theories and hypotheses.
- 

### Education:

---

Bachelor's Degree in Mathematics  
Waynesburg University, Waynesburg, PA
