
MECHANICAL FOREMAN CV

If you are applying for a Mechanical Foreman position, you should present your CV in ways where your expertise in managing construction industry operations will stand out. Experience in mining, fabrication, plant maintenance, offshore construction, and other fields in the industry should be stressed out in your Mechanical Foreman CV. Also include your expertise with significant health, safety and welfare regulations since this is an indispensable quality of a foreman. Qualities such as accurate interpretation of engineering sketches, accounting skills, and strong computer skills may also be highlighted. Give your CV an edge among others by following the sample CV of a Mechanical Foreman below.

Owen Vaughan

P.O. Box 935, 2277 Convallis Av., Dunbartonshire, EL76 2WZ Date of Birth: December 7th, 1994

Email:[email] Mobile:07738 291839 Tel: 01454 791067

PERSONAL STATEMENT:

My objective is to oversee performance of construction employees ensuring that outputs are completed and conform to high quality and standards required by clients and regulating authorities. In order to do this, I aim to supervise work ethics closely in all phases of the project and provide regular reports to higher management for easy progress monitoring and timely intervention to arising issues. My years of experience as a mechanical foreman honed my skills in project management and enabled me to pursue accuracy, timeliness, and strict compliance of the projects under my supervision. Given the chance, I look forward to contribute for the success of the company.

SKILLS PROFILE:

Highly experienced in working as Foreman in plants and mining and construction industries
Exceptional knowledge of health and safety regulations
Sound knowledge of operation of mechanical equipment
Familiarity with equipment repairs and maintenances
Ability to interpret technical specifications and drawings
Ability to address technical problems of boilers and other plant units

EDUCATIONAL BACKGROUND:

HND in Mechanical Engineering
Totton College

Totton
October 2010 to June 2012

A-levels: English Language, Chemistry, Mathematics, Physics
Friern Barnet School

Friern Barnet
September 2005 to June 2010

RELEVANT WORK EXPERIENCE:

Aker Solutions
Mechanical Foreman

Aberdeen
January 2013 to Present

- Performed equipment installation and maintenance work based on statutory regulations.
- Worked with Engineers to plan and commission assigned projects.
- Performed repairs of low voltage and high voltage systems.
- Supervised mechanics and monitored site operations.
- Completed the assigned work within assigned budget and timeline.
- Ensured that all staffs followed safe working practices.

Klaw Products Ltd
Mechanical Foreman

Westbury
July 2012 to January 2013

- Ensured that all installations, configurations, repairs and maintenance work is performed with company guidelines and safe practices.
 - Developed preventive maintenance programs to avoid breakdown and delays.
 - Performed root cause analysis of machine failures and proposed corrective actions.
 - Enforced health and environmental standards among mechanics.
 - Developed best practice to reduce waste and operating cost.
 - Participated in budget preparation and expense management activities.
