
NUCLEAR TECHNICIAN RESUME

Summary:

Seeking the job of a Nuclear Technician in a world renowned organization.

Professional Experience:

Senior Nuclear Technician January 2007 – Present
Federal Nuclear Power Plant, New York

Responsibilities:

- Maintained the reactor process in the nuclear power plant and loaded the nuclear fuels in the reactors.
- Coordinated with radiation inspectors to monitor radiation levels in work areas.
- Enforced safety regulations in the work areas at all times to ensure the amount of radiation is maintained at a minimal level.
- Supervised the workers in decontaminating work areas in case radiation exposure go beyond the expected limits.
- Handled remote control mechanical arms in handling high radiation content materials inside the hot areas.

Nuclear Technician May 2004 – December 2006
Federal Nuclear Power Plant, New York

Responsibilities:

- Ensured all safety equipment and gears are ready and available at all times to minimize radiation poisoning in the nuclear facilities.
- Conducted inspections in the regulations and used remote control instruments in handling radioactive materials.
- Coordinated with the supervisors if malfunctions are detected and performed at once troubleshooting procedures.
- Inspected gauges and instrument panels in the machine systems to ensure operations are at a normal state.
- Monitored the schedules of workers especially those working at graveyard shifts.

Nuclear Technician Assistant March 1999 – May 2004
National Nuclear Power Plant, New York

Responsibilities:

- Maintained the reactor process in the nuclear power plant and loaded the nuclear fuels in the reactors.
- Coordinated with radiation inspectors to monitor radiation levels in work areas.
- Enforced safety regulations in the work areas at all times to ensure the amount of radiation is maintained at a minimal level.
- Supervised the workers in decontaminating work areas in case radiation exposure go beyond the expected limits.
- Handled remote control mechanical arms in handling high radiation content materials inside the hot areas.

Nuclear Technician May 2004 – December 2006
Federal Nuclear Power Plant, New York

Education:

Masters Degree in Nuclear Technology
University of Arizona, 1999
Bachelor of Science in Physics
University of Arizona, 1996

Skills/Certifications:

- Strong leadership and teamwork attributes
- Excellent time management skills
- Proficient in computer skills
- Knowledge in nuclear physics
- Ability in assessing the safety regulation of the nuclear plant

Associations/Organizations:

American Registry of Radiologic Technologists, Secretary
American Society of Radiology, Member
