# SHAREPOINT DEVELOPER CV

---

SharePoint Developer is a complex profession. These professionals are usually hired by business owners primarily to solve business problems. They use different tools such as SharePoint Designer, InfoPath and Visual Studio for script development. For complex projects, tools as sophisticated as WSPBuilder, VStools for SharePoint and STSDev are utilized. When you write a SharePoint Developer CV, make sure that these skills and knowledge are incorporated in the CV in the most apparent manner. You can stress out these skills in the objective section of your resume. Look how the objective is written below in the sample CV of a SharePoint Developer.

**Blossom Glenn**

## PERSONAL PROFILE:

---

I am an experienced SharePoint Developer with expertise in the following areas: application development and management, coding, design and data implementation, servicing systems and data migration, software configuration management, and unit testing. I have over two years of experience in IT architecture and document management. I also have a solid background in developing Microsoft SharePoint based solutions. During the course of my employment, I have learned various techniques and practices in SQL Reporting, business analysis, and Windows workflow development. I have first hand experience in Intranet UI design, configurable custom web parts, and customize SharePoint sites. Armed with these tools, I am confident that the company's objectives will be achieved.

---
