
WELDING ENGINEER RESUME

Job Objective:

Welding Engineer with years of experience and training searching for opportunity to work for dependable organization.

Summary of Qualifications:

- Remarkable experience in utilizing Welding codes
 - Steep knowledge of manufacturing processes, quality, tooling, weld tooling design, and total preventative maintenance
 - Outstanding knowledge of materials, substances, metallic and friction welding
 - Proficient in adjusting parameters for MIG and MIG and pulse schedules and in outlining sketches, engineering drawings and common computations
 - Familiarity with GMAW, TIG, RSW and FCAW processes
 - Amazing ability to multitask and to manage automated welding applications
 - Remarkable ability to use common measurement tools
 - Superior interpersonal skills
 - Excellent written and oral communication skills
-

Work Experience:

Welding Engineer, August 2005 – Present
The Babcock & Wilcox Companies, Norfolk, VA

- Established and enforced state-of-the-art welding production procedures.
- Managed welding production issues and developed welding procedures.
- Supervised welding training programs and regulated overall welding engineering needs.
- Guided shop floor welding technicians as well as designed fresh products.
- Managed and computed customer required documents.
- Executed quality improvement, lean six sigma and human performance advancement initiatives.

Welding Engineer, May 2000 – July 2005
Stewart, Cooper and Coon, Norfolk, VA

- Reviewed processes for continuous improvement and innovated welding techniques.
 - Formulated WPS and PQR documentation and outlined quality system for maintaining process.
 - Conducted weld analysis and monitored welder's certification.
 - Computed test plans and executed experimental welding for fresh equipment.
 - Outlined fixtures and gages to support new procedures.
-

Education:

B.S in Electrical Engineering, Newman University, Wichita, KS
